Question 1 of 2

What is the first issue you spot in this phishing email?

From: mastercardsIT@gmail.com
To: employee@email.com
Subject: URGENT! Password Reset Required
—
Body:
Hello (insert name) ,

Your email account has been compromised. immediate action is required to reset your password!

Click here to reset your password in the next hour or your account will be locked:
https://en.wikipedia.org/wiki/Phishing

Regards,
Mastercard IT

- ○ The email looks legitimate
- ◉ Suspicious looking source email address
- ○ The subject line says URGENT!

Great Work!
Correct! First of all, there is a typo in the email address. You can also see that it is coming from gmail, not a Mastercard email.

Regards,
Mastercard IT

- ○ Write more text
- ◉ Improve the spelling, grammar & sloppy layout
- ○ Suspicious or unusual attachments
- ○ Nothing! This email is expertly put together.

Great Work!
That's right - in addition to this, the hyperlink could be masked in plain text.

Phishing Email Creation for Training Purposes

From: Mastercard IT Security

To: employee@mastercard.com

Subject: Action Required: Verify Your Mastercard Account Credentials

Body:

Dear <Employee Name>,

Our security systems have detected unusual sign-in activity on your Mastercard account from an unrecognized device in an unfamiliar location. To ensure the continued security of your account, and Mastercard's internal systems, we require you to verify your credentials.

Please confirm your identity by clicking “Verify My Account” below, and follow the steps to verify your account within 24 hours. Failure to do so may result in temporary suspension of your account access, which could impact your ability to access internal Mastercard tools and resources

Verify my Account

Thank you for helping us keep Mastercard secure.

Best regards,
James Whitfield

Why this is important

Interpret the results

First, let's have a look at the results of the phishing campaign.

This table helps you to identify which teams appear to be **more likely** to fall for a phishing email than others.

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

When you're ready, start the quick quiz to see if you've correctly identified the most vulnerable teams.

Here are some resources to help you

The percentages shown are based off the total number of staff members who **received** the email.

For example if 100 people received the email and 50 people opened it - the email open rate would be 50%.

- **Email open rate** = the percentage of people that opened it

HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

Task 2: Interpret phishing simulation results

1 2 3 4 5 6 7

Question 1 of 1

Which teams performed poorly in the phishing simulation?

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	**66%**	**28%**	**18%**

- Marketing and Card Services teams
- IT and Reception teams
- HR and Marketing teams
- HR and Engineering teams

Great Work!
Correct! The HR and Marketing teams performed poorly in the simulation and should receive further training.
